## **ON A LIGHTER NOTE**

#### **PRESIDENT**

Well here we go for 2015

Firstly, I wish all my fellow members and their close ones, all the very best of everything you could wish yourself for this New Year.

The new year really started off with lots of noise, action, and excitement at Sandown Race course last Sunday with the big demonstration day and the inaugural series of what I hope will become a regular and permanent feature, -- Formula One Racing.

Those who were not there surely missed a great spectacle, the sight and sound of large scale 60cc powered aircraft pylon racing at speeds in excess of 220km/hr. My congratulations to those members of our club who flew in those races, and specially their support crews, (you know, the ones that do all the messy bits and the chasing after models)

Other aspects of aeromodelling such as, powered sailplanes, aero tow, aerobatic sailplanes, general purpose models, high speed gliders, and of course, Chris Callow's world champion FAI pylon machine, which is almost unbelievable at around 350km/hr were also demonstrated with great skill for the public.

I cant leave the subject without offering my congratulations to Stephen Green and his team for the organisation and running of the whole operation, it was excellent, and can only be good for our hobby.

STOP PRESS I have just been speaking to Stephen G and he informed me that Formula One Racing is definitely to be a

Well I guess, after such an exciting and successful start to the modelling year

we can all now relax and enjoy a full year of smooth take-offs, great flights, and, most of all, soft and smooth landings.

Be good to yourself

Field Managers Report -January 2015.

By Norm Morrish

Hi guys, before talking about the field, I wish you all good health, happiness and great flying for 2015.

We have a serious problem with our runways at present, magpies are ripping it up to get to the Schaefel Beetle grub.

The beetle in grub form eats the roots of grass causing the grass to die and the ground becomes bare. Birds, usually Corellas, see this dying grass and know the grubs are under it so rip it up. In our case it is the magpies.

Corellas do more damage than magpies because they only have short beaks.

Ordinary grass have single roots, where most couch have multiple roots which regenerate and survives the beetles.

As a result the couch does not die off and the birds are less likely to rip couch up. I proved this at home on my acre property that suffered from the beetle. It is near impossible to poison them because the ground must be saturated so the poison can reach the grub.

We converted the lawn to Kyku couch and never had a problem in the past 5 years. I also see it at golf clubs where the birds rip up the grass beside the fairways but not the Santa Anna couch fairways.

My long term plan is to convert our runways to Santa Anna. This problem may need us to speed up the program. Until then take note of where the runways are damaged and try to avoid the areas for both takeoff and landings.

Please contact me on 0418 586 406 if you have had experience with solving the problem or have a method to deter the birds from our runways.
