

IMPORTANT REFURBISHMENT & CONSTRUCTION WORKS UPDATE.

Dear Members,

For further discussion at the meeting on Wednesday night, we wish to inform you of some upcoming and ongoing works aimed at improving our facilities:

Work has commenced on the **new pilot barriers** under the supervision of Andrew Smallridge. This project covers **all runways**, and you will note a slight change in location to the western barrier. Be mindful of barricading around these zones for your safety.

In addition, refurbishment of the **pergola (old radio shelter)** and **internal clubhouse door painting** is scheduled to take place on **December 18, 19, and 20th**. The field will remain open, however access to **some areas of the pits and clubhouse** will be restricted. Please ensure you remain clear of any areas that may be **barricaded off**. Additional maintenance projects will continue during early 2025.

All of these projects are part of the 2023/2024 budget and have been costed carefully. Thank you for your patience and cooperation during these improvement efforts. Please prioritise safety and adhere to any signage, restricted area notifications or directions from committee members.
