Dear Members,

First Stage of Major Runway Upgrades

We are conducting a trial of some specialised mowing equipment at the field on Friday morning, February 28th starting around 1130. This trial will take place on either the eastern or main runway and run for several hours.

The field will not be closed, but the trial will impact on the use of those runways at some point during the morning and afternoon. Mowing team members will also be conducting their regular maintenance during this time.

Please observe any instructions from the field team on Friday regarding the activity on the runways. Model aircraft are not permitted to operate on the runway when mowing is in progress. The western runway will not be affected.

Our thanks to Norm Morrish and David Law for getting this trial underway, and to the mowing team as always.

We appreciate your cooperation as we take these necessary steps to enhance the quality of our runways.

**Keith Quigg | AUS 22897
